

DASA

REST based File Sharing and Storing Service

Supervisor: Prof. David Bromberg

Student: BUI The Anh

What Done

Implemented : `org.rest.service.entities.FileService.java` in which contains rest based functions:

- `/credential`
- `/drive`
- `/uploadfile`
- `/downloadfile`

How to install it

Run :

```
mvn install
```

```
mvn jetty:run
```

What Not Done

The rest of requirment is not implemented

Difficulties encountered

Still do not know how to use the rest based services in code. It leads to not test or further implementation.
